TYRES**

# NOKIAN TYRES INTUITU™

## QUICK START GUIDE

**NOKIAN TYRES  
INTUITU™ APP**

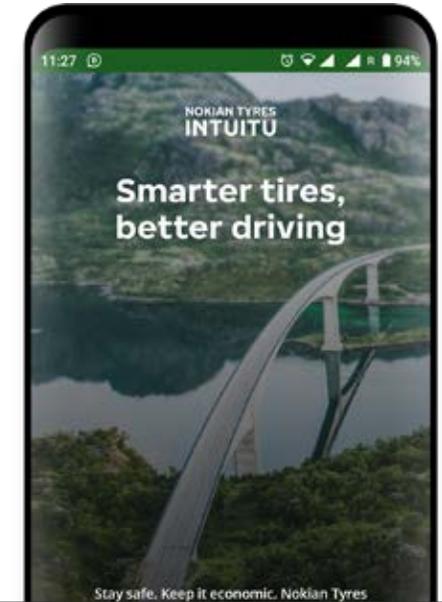

**REGISTER YOUR  
TIRES AND GET  
AN EXTRA YEAR'S  
WARRANTY**

**1 DOWNLOAD THE APP**

Search for 'Intuitu' or 'Nokian Tyres'

**Tip:** If the app doesn't appear in the store, it may be that your phone is too old to work with the app.\*

**Tip:** If you have smart tires, allow the app to use location services **all the time**. This way you will get real-time warnings of problems in your smart tires. Your location information is never shared with anyone.

**2 CREATE AN INTUITU  
ACCOUNT**

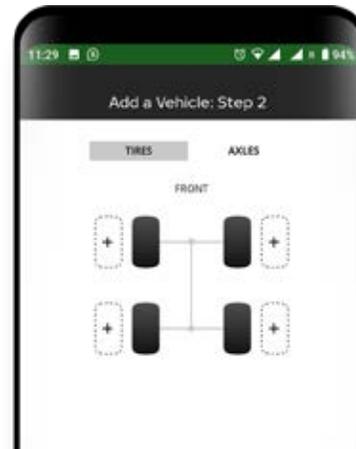

1. Enter an email address and click the Send Code button. You will receive a verification code by email.
2. Enter the code that you received.
3. Create a password.

If you've been invited to join a fleet, you will be asked to confirm this.

**3 ADD YOUR VEHICLE**

Select the type of vehicle you have, the make and model. You can change the axle and tire configuration if needed.

**4 REGISTER YOUR  
TIRES**

Find the tire ID number for each tire and enter it into the app. If the tire is a smart tire, the app will automatically recognize this.

**Tip:** Remember to keep your proof of purchase

\*Works on Android 8 or newer and iPhone 11 or newer

**NOKIAN TYRES  
INTUITU™  
SMART TIRES**

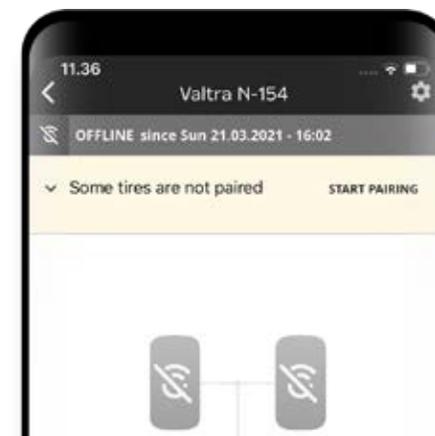

**AND IF YOU'VE  
GOT SMART TIRES  
PROCEED WITH THE  
FOLLOWING STEPS**

**5 PAIR YOUR SMART TIRES\***

Wake up the tires by rotating them and then start the pairing process. The app will pair one smart tire at a time and this can take up to 10 minutes. Keep the tires awake – they go to sleep after five minutes without rotation.

**Tip:** For best results, stand next to your tires.

\*Only required for iPhone. Android phones do not need this step.

**6 MONITOR  
YOUR SMART  
TIRES**

When your phone is near your smart tires and the tires wake up, you will see your tire data in real-time. Tapping on the tire image will show you more information about the tire.

**7 INVITE OTHER  
PEOPLE**

Invite other people to your fleet from Menu > Fleet management. Then everyone can see the tire measurements, even if they are not near the tires.\*

**Tip:** You need to send the invitation before the other person creates their account.

\*Mobile network coverage needed

**HAVING  
PROBLEMS?**
